

DuroVac Continuous Duty Vacuums

LIFETIME Series

Built from the ground up for contractors. Perfect for concrete grinding & wood floor sanding.

The DuroVac "LIFETIME Series" is for contractors and others who need to concentrate on WORK and not their vacuum system. **Never shut down production to clean the filters!**

The system is so efficient that fines from concrete floor polishing machines & hardwood floor sanders will NOT plug and blind the filters!

When the canister is full, our "reverse air" system back-cleans the filters in just seconds, and gets you working again .. fast.

The LIFETIME Series vacuum features a quiet, 4000 hour, brushless "reluctance" type vacuum producer. Regular vacuums last just 800 hours and less.

And, like all our systems, they feature a backup safety filter that saves your new vacuum from dust damage if ever the primary filters fail.

LIFETIME Series Common Features:

- 4,000 hour rated single phase motor
- filtration rated at 99.99% @ 0.4 microns, standard
- 99.9% @ 1 micron safety filter, easily upgrades to HEPA
- rugged, all steel frame construction
- a beautiful, powder coated finish

LIFETIME Series Model Specific Features:

	LT50	LT100	LT200
System Horsepower	16.4A (120V)	16.4A (120V)	16.4A (220V)
CFM (Maximum)	200 scfm	200 scfm	400 scfm
Vacuum (Maximum)	90 " S.P.	90 " S.P.	90 " S.P.
Primary Filter (Sq. Ft.)	8.50 sq. ft.	14.0 sq. ft.	35.0 sq. ft.
Storage Capacity	5.70 US gal	5.70 US gal	13.6 US gal
Noise Level @ 3ft	83 dBa	83 dBa	AVAILABLE
Weight Empty	92 lbs.	96 lbs.	SOON.

The LT50 is a terrific little vacuum cleaner. It features the long life motor and rugged construction as its larger cousins. It is recommended for heavy housekeeping with a single 1.5" or 2" I.D. hose up to 25 ft long.

The LT100 is the vacuum to buy for edge grinders and single floor sanders. Its filters system is so good that it just keeps running where all others fail. Use with a single 1.5" or 2" I.D. hose up to 25 ft long.

The LT200 is a twin motor machine, this unit will perform like nothing else in it's class.

LT vacuums often require a pre-separator to collect bulk material. Contact your distributor for details. These systems are portable only; they are not suitable as a central vacuum. Many options available.
